

Large Surface Folding Pool ET Large

The pool is primarily designed as a mobile environmental protection device especially suitable for quick response to accidents wherever the environment is threatened by leaks of hazardous substances into soil and/or water. It functions as a portable reservoir for hygienic and decontamination purposes. It has proved to be very efficient in preventing leaks of oil and oil-based products or chemicals in industry, by removing spilt fuel, decontaminating and cleaning vehicles of all types.

- ▶ Packed construction takes minimal space
- ▶ Simple and quick unfolding
- ▶ Easy to drive in
- ▶ The unique patented design
- ▶ Protective pad and under-wheel tracks are standard accessories
- ▶ Production of other dimensions is available according to individual customer's requirements
- ▶ Possibility of adding of drain hole and ball valve

**The special folding pool with
the unique patented design**

Simple folding

Possibility of adding of drain hole and ball valve

Drive in through reclined side wall on under-wheel tracks

Side supports on the outer side of the spill berm

Examples of use

Technical details

Unlike standard products the pool is made of thick PVC fabric with a special protective proofing. The fabric itself is proofed with polyethylene (PES/PVC 2 lb/10.7 ft²) resistant to the effects of industrial fluids, chemicals, hydraulic lubricants and all oil and oil-based products such as fuel oil, diesel fuel, gasoline, etc. (see Chemical resistance certificate in the relevant chapter at the end of catalog).

Transport bag, under-wheel tracks and protective pad are standard part of the product.

The product is protected by registered utility model (technical patent) no. 22118 lodged with the Industrial Property Office.
